Proposed Structure Plan Main Access Road	

Northern permanent car-parking area

Northern overflow car-parking area

Central permanent car-parking area

Southern overflow car-parking area

Southern permanent car-parking area

Potential Park access subject to consultation with NSCC Traffic Department

Car Parking
Permanent car parking areas will consist of both sealed paving and grass pavers. Overflow parking will consist of well drained, grassed areas.
Permanent parking capacities (approx):
North Carpark = 420 cars
Central Carpark = 430 cars
South Carpark = 600 cars
Overflow parking capacities (approx):
North Carpark = 300 cars
South Carpark = 250 cars
Total capacity (approx) = 2000 cars

Directional signs to both entrances to be placed at strategic locations along route in consultation with NSCC.
