# FURTHER SUBMISSION FORM

## AUCKLAND REGIONAL PLAN: COASTAL

## PROPOSED PLAN CHANGE 4 – MANGROVE MANAGEMENT

Name and address of original submitter	Original submission number and point of submission <small>(e.g. 2/91)</small>	The particular part of the original submission you support or oppose <small>(ie Please repeat the wording in the Summary of Submissions)</small>	Support or oppose <small>(delete one)</small>	The reasons for support or opposition	The decision sought from the Council <small>(e.g. whether you seek that the whole or part (which part) of the submission be allowed or disallowed. Please give precise details.)</small>
No 38		TARARATA CREEK I'm thinking and witness this above creek this movement is quite severe it has a cave underneath		ITS How the creek is managed For example NZ TRANIST is putting motorway right beside the creek not to be filled up with rubbish or heavy Rocks water flow would stop the normal flow.	
		Plenty of Mangrove growing its movement is approx 12 metres by 4 metres and the soil is dropping down on the side of the creek every		Silt is still moving in the Manukau Harbour ITS ONLY HELPING TO STOP the silt moving away from the HARBOUR bind the MUD and silt together insects and bird life	
		time I visit there Five soil movements on the side of the creek moving and dropping down on the side AT Manhunga Drive Storm water pipes			
		blocked (2) only Top to bottom filled with silt How I know I walk through this creek picking up piles of rubbish and still picking up more			

Note: This form may be used but it is not essential. However, all of the details sought above should be noted in your submission.
