

## NOTES ON PLAN ANNOTATION

Chapters 10, 20 and 32 have been varied by Variation 1 to this Plan. The variation is shown by way of shading. The wording covered by appeals on sub-sections, paragraphs and provisions is indicated with a darker shading.

The Plan has been annotated to show individual points of relief sought in appeals lodged with the Environment Court. While every attempt has been made to include all points of appeal it is recommended that Auckland Regional Council officers are contacted if there is any clarification needed.

The appeals are annotated in the following manner: the Environment Court number which includes the year the appeal was lodged (e.g. E412/04), and the individual point of relief allocated by the ARC (e.g. E412/04/32), followed by the appellant's/appellants' name/s. (e.g. E412/04/32 Air, Land and Water Limited).

Appeals that relate to whole chapters are listed at the beginning of the relevant chapter.

The appeal annotations within chapters are shown in bold and within square brackets [ ]. If an appeal relates to a whole section or sub-section of a chapter (e.g. 4.1 or 4.1.3) the annotation is shown at the beginning of the section or sub-section, immediately below the relevant heading. If an appeal relates to a paragraph or provision (objective, policy, rule or other method) the appeal is noted at the end of the paragraph or provision.
